DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 35-42, drawn to an isolated nucleic acid comprising at least about 20 nucleotides of a Brassicaceae delta-15 fatty acid desaturase having a mutation, classified in class 536, subclass 23.6.
 - II. Claims 43-51, 58 and 59, drawn to a Brassicaceae plant comprising at least about 20 nucleotides of a Brassicaceae delta-15 fatty acid desaturase having a mutation and a method of producing said plant, classified in class 800, subclass 298.
 - III. Claims 52 and 53, drawn to a Brassicaceae plant comprising at least about 20 nucleotides of a Brassicaceae delta-15 fatty acid desaturase and at least about 20 nucleotides of a delta-12 desaturase having a mutation, classified in class 800, subclass 298.
 - IV. Claims 54-57, drawn to vegetable oil, classified in class 554, subclass 8.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I-IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different designs, modes of operation, and effects (MPEP § 802.01 and § 806.06). In the instant case, the different inventions are distinct products and one is not required by any of the others. The plants of Groups I and II differ genetically and biochemically and neither requires the nucleic acid of Group I, wherein the

claimed plants can be made by a method that does not require the isolated nucleic acid, such as by mutagenesis of the plant. Furthermore, the oil of Group IV would not be distinguishable from oil made by a different method than extraction from the plants of Groups II or III, such as by extraction from another plant, chemical synthesis or mix.
